TOWN CLERK, MONSON, MA

TOWN OF MONSON CONSERVATION COMMISSION

**MEETING MINUTES WEDNESDAY, JUNE 16, 2021 7:00 PM
TOWN OFFICE BUILDING, SMALL MEETING ROOM
110 MAIN STREET, MONSON**

The listings of matters are those reasonably anticipated, by the Chair, which may be discussed at the meeting. Not all items listed may in fact be discussed and other items not listed may also be brought up for discussion to the extent permitted by law.

Members Present: Glenn Colburn, Martha Gilmore, Davis Johnson, Leslie Duthie

7:00PM Meeting is called to order

-102 Lakeside Dr. Adrienne Dunk from GZA; to discuss filing for work in RFA

Adrienne Dunk joins and shares maps of the Parcel at 102 Lakeside Dr that depict wetland delineation for proposed work in the back yard within the riverfront area. Review of 1997 development on land, and further proposed work within that area. Limit of work will not be increased; buffer zone will not be infringed.

Glenn Colburn asserts that though the land is not being developed any MORE, the work is significant enough to constitute erosion controls, and work has already been done on this land without notice to the Commission, necessitating some sort of update on work controls in place for this work.

Leslie Duthie requests further information on the existing work area/pool/patio- that it is an inground, surrounded by a concrete patio, all of which is proposed for removal.

RFD is requested by the Commission for information regarding the methods in which the work will be done, and that an as-built is provided for all work done on this parcel

-Mike Tassinari, H&L Builders 104 Bogan Rd; to discuss runoff/erosion

Photos, videos, letters, and calls received regarding erosion into the road

Erosion controls in place

Antitracking pad in place

Glenn Colburn suggests that additional conservation seed be laid down on raw areas to prevent further erosion, to which Mr. Tassinari replies 100lbs of been spread since the erosion problem was presented as well as terrace and loamed first 100 ft.

Highway Department did a site visit following heavy rainfall and verified that the controls put in place were keeping runoff or pollution from the road.

-Parcel 29-1 Upper Hampden Rd, Paul Woloshchuk; to discuss erosion into Twelve Mile Brook

Site Visit was performed by the commission to see activity. Silt has gotten into 12 Mile Brook; photos from property, down the road, into the brook. Until now the work has been outside jurisdiction.

Glenn Colburn states that activity is not in wetland resource area or buffer zone but has impacted a resource area. Wetlands Regulations 10.02 enforcement order allows issuance of enforcement order.

Enforcement Order is issued to immediately cease and desist all work unless specifically designed by engineer and approved by the commission.

Paul Woloshchuk has hired engineer Andy Baum to create an emergency action plan with temporary measures and perform a site walk with Conservation NLT June 30, 2021 and future operations maintenance and control plan NLT July 21, 2021, per the enforcement order.

Members of the public are given the opportunity to express concerns and report work complaints regarding the project. Complaints include runoff, noise, dust, flooding, rock slamming, landslides, house shaking etc.

Conservation Commission asserts that although the project has not been under jurisdiction, the work that has been observed is shocking, and does not appear to be in good faith as a member of the community.

Business:

A motion is made to approve the minutes from 5/26/21

Seconded

No further discussion

So moved

8:00PM A motion is made to adjourn

Seconded

No further discussion

So moved

Respectfully Submitted,

Conservation Clerk
